ACTIVE CALENDAR

“To keep moving well, keep moving more frequently”

Welcome to

YOUR ACTIVE CALENDAR

Thank you for buying this calendar, or, **congratulations** on being the owner of this little piece of movement magic. We hope you enjoy the gift of movement. It's also great for keeping track of important dates!

Small changes over-time to break up long periods of inactivity are hugely beneficial at any age.

This calendar provides prompts and ideas and a way of recording your progress and supports you to develop your movement/mobility habits. In making a commitment to moving more it's a good idea to think about why and how this could help you get back to the things you enjoy or maybe you are looking forward to a big event or an important day. Is there a hobby you would like to return to, a task you wished felt easier?

Planning 'when' to move more is an essential first step in creating new habits and It's never too late to start.

“

Motivation is what gets you started. Habit is what keeps you going

Jim Ryun

How to use this active calendar

Disclaimer: This is a calendar with information and suggested movements that most probably already feature in your activities of daily living. You take responsibility for your own use of this calendar. The authors and advisors of the activities in this calendar accept no liability. All content is provided for general information only and should not be treated as a substitute for the medical advice of your own GP or any other health care professional.

Each month shows a vital everyday movement that can help improve your mobility, strength and balance, add them throughout your day at a time in the day that's best for you:

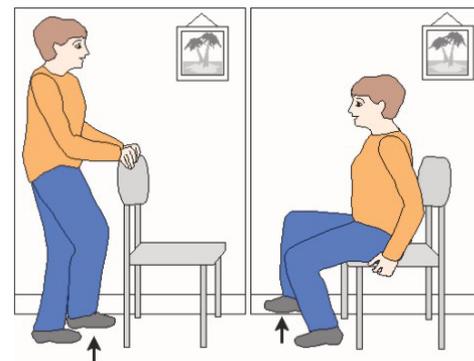

- Get into the habit of doing 1-2 minutes of circulation boosting each hour of your day if you've been seated a lot or inactive.
- Check your progress every month with our **FOUR progress checks**
- Each day of the year in your calendar has three circles. These circles are for you to tick the number of times you "crowbarred" additional movement minutes into your day, or joined in with a movement snack on Facebook.

TUESDAY	WEDNESDAY
1 St. David's Day	2
<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>

Start every movement snack with 1-2 minutes of circulation boosting:

CIRCULATION BOOSTING - ARM AND LEG MARCH

- ▶ Stand, or sit tall, using hands for support as you need
- ▶ March steadily with control
- ▶ Build to a rhythm that is comfortable for you
- ▶ Continue for 1-2 minutes, you should feel the need to take deeper breaths (not out of breath)

Your progress checks

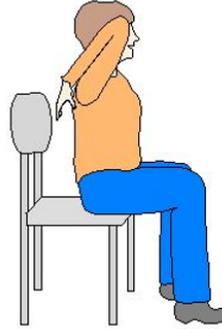

←
track your progress at the end of each month

SHOULDER MOBILITY

(CAN YOU REACH THAT ITCH BETWEEN YOUR SHOULDER BLADES?)

- ▶ Whilst keeping your head and neck upright, progress to touch the back of your head and then your neck
- ▶ If possible, lower your hand towards the shoulder blade and make a note of how far your fingers can reach

How far can I comfortably reach? (try with left then right arm)

1

I can touch my ear

2

I can touch the back of my head

3

I can touch the base of my neck

4

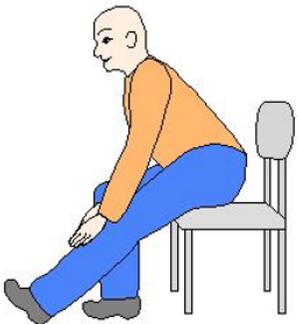

I can touch the top of my shoulder blade

Record how far you can comfortably reach below

JAN	FEB	MAR	APR	MAY	JUN
_____	_____	_____	_____	_____	_____
JUL	AUG	SEP	OCT	NOV	DEC
_____	_____	_____	_____	_____	_____

BACK OF THIGH STRETCH

(IS IT GETTING EASIER TO PUT YOUR SHOES AND SOCKS ON?)

- ▶ Sit towards the front of the chair with one foot flat on the floor and the other leg extended (straight) with the foot flexed (toe pointing up)
- ▶ Slowly reach forward, keeping the back straight, hinging at the hips and slide the hands (one on top of the other with the tips of the middle fingers even) down the extended leg in an attempt to touch the toes or reach beyond them.
- ▶ Keep the extended knee as straight as possible, but not locked out.

How far can I comfortably reach? (try left and right legs)

1

I can reach my knee

2

I can reach the top of my shin

3

I can reach my mid shin

4

I can reach my toes

5

I can reach beyond my toes

Record how far you can comfortably reach below

JAN	FEB	MAR	APR	MAY	JUN
_____	_____	_____	_____	_____	_____
JUL	AUG	SEP	OCT	NOV	DEC
_____	_____	_____	_____	_____	_____

🕒 4 POINT-BALANCE PROGRESS CHECK

- Stand next to a stable fixed surface or object
- In comfortable shoes, aim to balance in each foot position shown here. Build up to 10 seconds over time - record your progress.

HOW LONG CAN YOU HOLD EACH POSITION BUILDING UP TO 10 SECONDS MAXIMUM?

Record your best monthly scores below

	JAN	FEB	MAR	APR	MAY	JUN
Best level (foot position) reached	_____	_____	_____	_____	_____	_____
Time (in seconds) at this level	_____	_____	_____	_____	_____	_____

	JUL	AUG	SEP	OCT	NOV	DEC
Best level (foot position) reached	_____	_____	_____	_____	_____	_____
Time (in seconds) at this level	_____	_____	_____	_____	_____	_____

🕒 CHAIR RISE PROGRESS CHECK

- Sit in a hard chair of knee height (such as a dining room chair)
- Hip walk forward so your bottom is just past the centre
- Bring heels back and down in preparation to stand
- **Progression 1** - Increase difficulty and effort by positioning 1 foot slightly forward of the other (and still hip width apart)
- **Progression 2** - when you feel you've reached your ceiling of number of chair rises 30s, now slow down as you sit and add a 1-3 second hold/hover at the mid-point! (You'll be doing less of them but progressing your leg strength)

HOW MANY TIMES CAN YOU STAND AND SIT IN 30 SECONDS WITH CONTROL?

Record your best monthly scores below

JAN	FEB	MAR	APR	MAY	JUN
_____	_____	_____	_____	_____	_____

JUL	AUG	SEP	OCT	NOV	DEC
_____	_____	_____	_____	_____	_____

*NB: Add a * if your chair rises were completed slowly with a hold*

Alternative: Count the number of 'jockey lifts' instead - just raising your buttocks from the chair and returning to sit

RESOURCES

KOKU App

Keep On Keep Up (KOKU) is an award-winning, NHS approved app which enables older adults to access a tailored evidence-based strength and balance exercise programme to prevent functional decline and falls. For a brief introduction on KOKU see the website:

Morning mobility routine

JANUARY

These movements can be done in sitting or standing positions. These are beneficial because we rarely take the time to move our joints through their full range of motion. Improving mobility makes everyday tasks easier; like washing, dressing, reaching and bending required in daily life.

🕒 **START**

with 1-2 minutes of circulation boosting (See "How to use this calendar" for a reminder)

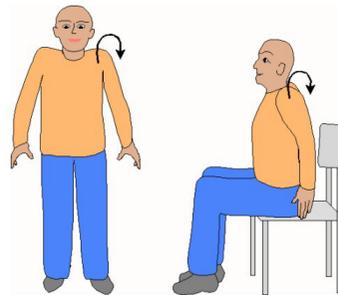

✅ **CHOOSE YOUR AMOUNT**

1, 3 or 5 times of each movement as part of your morning routine

HOW TO DO IT

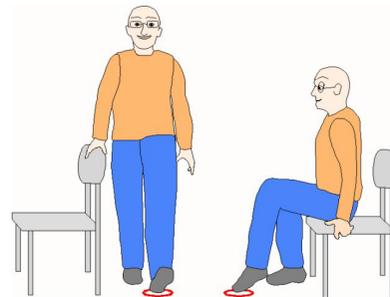

SHOULDER RAISE AND ROLL

- ▶ Stand or sit tall with your feet hip width apart
- ▶ Lift your shoulders up towards your ears
- ▶ Roll them backwards and squeeze your shoulder blades together
- ▶ Complete a circular motion of the shoulders, smooth and controlled

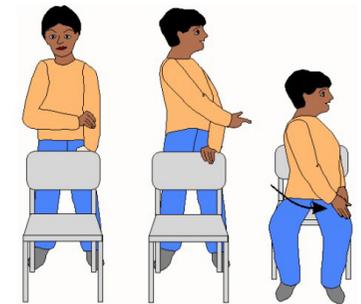

ANKLE ACTIVATOR

- ▶ Stand side on to (or sit tall at the front of) a sturdy chair or fixed support
- ▶ Stand taller, 'grow taller' between your hips and ribs
- ▶ Lightly hold the back (or sides) of the chair or fixed support
- ▶ Place the heel of one foot on the floor then lift it and put the toes down on the same spot

TRUNK TURNING

- ▶ Stand or sit tall with your feet shoulder width apart
- ▶ Turn your upper body (trunk, neck and head) to the left as far as you can slowly keeping hips facing forward
- ▶ Repeat on the opposite side
- ▶ If doing in standing, keep the hips facing forwards in the movement

SIDE BENDS

- ▶ Stand or sit with your feet shoulder width apart
- ▶ If in standing, be close to a fixed external support if needed
- ▶ Bend to the side and maintain weight even across feet (or buttocks if seated)
- ▶ Maintain shoulders facing forwards
- ▶ Return back to upright, pause.
- ▶ Repeat to the other direction
- ▶ Move smoothly and with control
- ▶ Be sure to pause in the centre each time

Rising from a chair (sit to stand)

FEBRUARY

Breaking up long periods of sitting is hugely beneficial for anyone regardless of age. The movement of standing up and sitting down helps to keep the legs strong. Decline in leg strength is mainly due to disuse and not disease!

FREQUENCY

Every hour if you have been inactive/sitting for too long

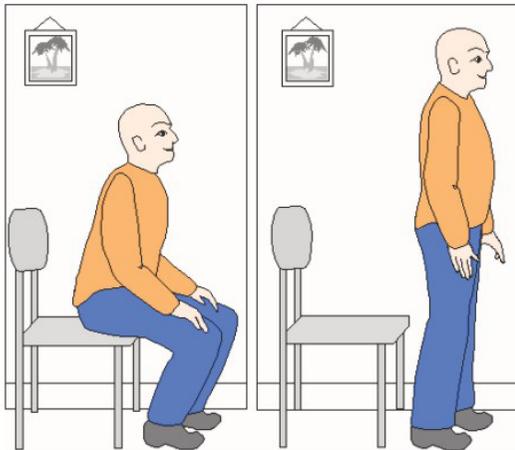

CHOOSE YOUR AMOUNT

Repeat 1, 3 or 5 times

how many times do you sit to stand across your day?

Try sitting a little slower to increase leg strength over time

HOW TO DO IT

- ▶ Walk your hips forwards to just past centre of the chair
- ▶ March the feet a bit to boost circulation
- ▶ Bring your heels back a little, but keep your heels flat on the floor
- ▶ Sit tall, hinge your trunk forwards
- ▶ Power up to stand
- ▶ Stand tall and move your feet a bit to pump the blood
- ▶ Step back a bit and feel for chair on back of legs
- ▶ Bend the knees, lead with your buttocks, sit down with control

A daily stretch routine

MARCH

Change your routine over time to add some slow, controlled stretches after you have been moving around, this can improve movement and make everyday activities feel easier.

FREQUENCY

Daily, best done after you have been active and are a bit warm

CHOOSE YOUR AMOUNT

Move in and out of the stretch positions slowly with control, build to the time shown and repeat 2-3 times across your day

HOW TO DO IT

CHEST STRETCH

- ▶ Sit tall away from the back of the chair
- ▶ Reach behind with both arms and grasp the chair back or place your hands on your hips
- ▶ Press your chest upwards and forwards until you feel the stretch across your chest
- ▶ Build over time to hold for 10-20 seconds

CALF STRETCH

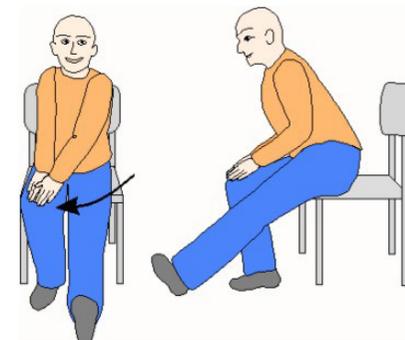

If you are not yet feeling confident to do this standing stretch position, focus on the back thigh stretch

- ▶ Stand behind a chair or fixed support, holding on with both hands
- ▶ Step back with one leg and press the heel down
- ▶ Keep standing upright, bend the front knee a bit
- ▶ Check that both feet face directly forwards
- ▶ Feel the stretch in your calf muscles
- ▶ Build over time to hold for 10-20 seconds
- ▶ Repeat on the other leg

BACK THIGH STRETCH

- ▶ Make sure you are right at the front of the chair
- ▶ Straighten one leg placing the heel on the floor
- ▶ Place both hands on the other leg then sit really tall
- ▶ Lean forwards with a straight back until you feel the stretch in the back of your thigh
- ▶ Build over time to hold for 10-20 seconds
- ▶ Repeat on the other leg

Sideways stepping and seated side step

APRIL

The muscles and the hip joint are used for stepping sideways, regaining balance and turning. If this is easy, you can progress it by stepping sideways over an invisible (or small) object.

FREQUENCY

Build into daily routines when standing at kitchen surfaces, garden walls, waiting in queues, or if sat for too long

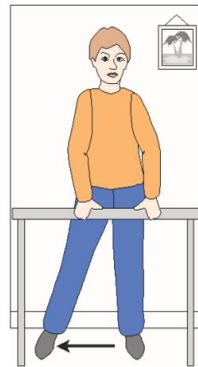

CHOOSE YOUR AMOUNT

1, 3 or 5 in each direction

HOW TO DO IT

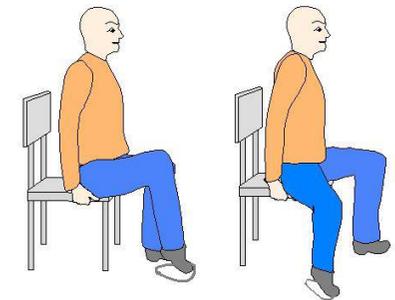

SIDEWAYS STEPPING

- Stand upright
- Keep the hips and toes facing forward and the knees soft
- Step sideways and put the toe down first, then the heel
- Bring the other foot to join it
- Choose a fixed/taller surface if you need more support

SEATED SIDE STEP

- Walk your hips forwards to just past centre of the chair
- Sit taller in an active sitting position, feet flat on the floor at hip width
- Use your hands to hold the side of the chair if needed
- Take a small sideways step, keep the knees low and focus more on using your feet and ankles to step sideways
- Step back to start position and repeat on the other leg

Heel Raises, Toe Raises

MAY

Balance reactions rely on strong ankles to take extra steps and to walk over uneven surfaces and walk in the sand in summer!

FREQUENCY

Daily routine - when you are waiting for kettle to boil, standing in queues, at the cash point or cleaning your teeth

CHOOSE YOUR AMOUNT

1, 3 or 5 per time. Repeat across your day

HOW TO DO IT

HEEL RAISES IN STANDING

- ▶ Stand tall holding a sturdy chair, table or the sink
- ▶ Raise your heels taking your weight over your big toes
- ▶ Hold for a second
- ▶ Lower your heels with control

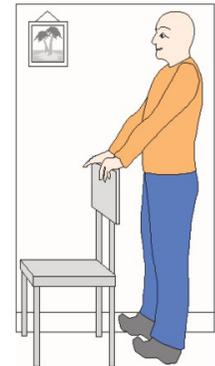

HEEL RAISES IN SEATED

- ▶ Raise your heels taking your weight over your big toes
- ▶ Hold for a second
- ▶ Lower your heels with control

TOE RAISES IN STANDING

- ▶ Stand tall holding your support
- ▶ Raise your toes taking your weight back into your heels without sticking your bottom out
- ▶ Hold for a second
- ▶ Lower your toes with control (you may find it easier to do this with a wall behind you)

TOE RAISES IN SEATED

- ▶ From active sitting position, move the foot slightly in front of the knee
- ▶ Keep the heel on the floor and raise the toes/foot
- ▶ Hold for a second
- ▶ Lower your toes with control

Walking Prompts

JUNE

If you enjoy walking, it will be important to you to 'keep on walking'. Here are some ideas for you to continue to progress your walking confidence over time and don't forget to compliment your walking activities with some strength and balance practise

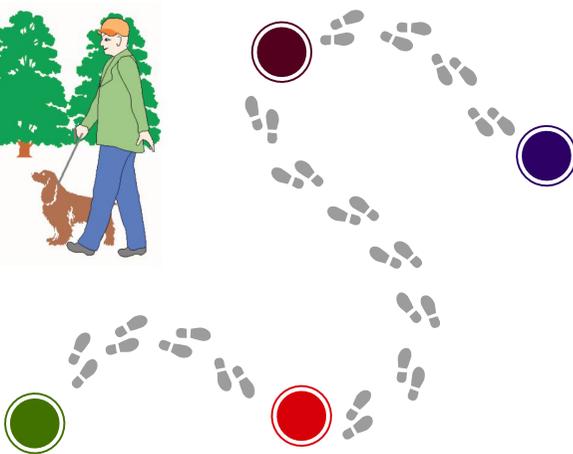

FREQUENCY

If walking is achievable for you, plan frequent walks into your week and add a bit of huff and puff where you can

CHOOSE YOUR AMOUNT

Any number of minutes of walking is a valid and valuable start. Build towards 30 minutes each day

HOW TO DO IT

DON'T JUST COUNT YOUR STEPS (IF YOU HAVE A FITBIT/STEP COUNTER)

- ▶ Consider the effort of your walking, not just the number of steps/step count on your device
- ▶ Plan to add an intensity structure to your walks; start out easy pace - confident stride, add then, add some shorter bouts of longer strides to increase the effort/feel deeper breaths, ending your walking as you started with less intensity (allowing heart rate and breathlessness to recover)

EXPLORE YOUR FOOT PLACEMENT

- ▶ Have attention on leading/landing heels first and rolling through the foot
- ▶ Have attention on the movement in the rear foot, pushing forwards
- ▶ Shorten your stride when going up slopes

STEP CHANGE PROMPTS

These are just 2 of LLTs 12 step change prompts taken from our walk-ways to strength and balance education modules. For more information about the walkways to strength and balance modules, visit www.laterlifetraining.co.uk/

Knee Bends in 3 Positions (preparing to pick up objects)

This movement practices moving feet across 3 positions and will help to feel more confident over time. If you feel a bit wobbly, take as many extra steps as you need to regain your balance. Practice balance to improve your balance.

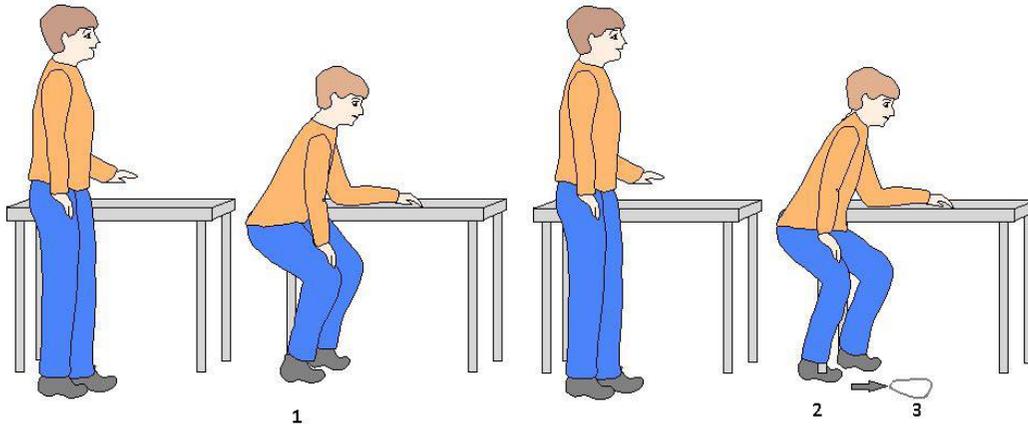

FREQUENCY

Practice a couple of times each day when stood near a fixed stable support

CHOOSE YOUR AMOUNT

Practice the knee bends 3-5 times in each position

HOW TO DO IT

Stand upright and steady with hand lightly on a fixed support

- **Position 1 - feet placed hip width apart**
Keeping the trunk lifted, slightly hinge at the hips, bend the knees for a moment and return to upright position
- **Position 2 - change the foot position so that feet are now shoulder width**
Repeat the knee bend, stand up and return to hip width stance
- **Position 3 – change the foot position stepping the outside leg slightly forwards and repeat the knee bend**
Return to stand and hip width

In all 3 positions maintain equal weight across both feet during a shallow knee bend

Wall press and wrist strengthener

AUGUST

Keeping wrists strong helps with gripping, lifting, carrying and opening jars. Along with the wall press these movements enable you to push your own body weight required for things like having a bath, moving around in bed and push up out of chairs and from the floor.

FREQUENCY

Build into weekly routines, 3 days of the week, for example when you take out the rubbish or prepare the recycling

CHOOSE YOUR AMOUNT

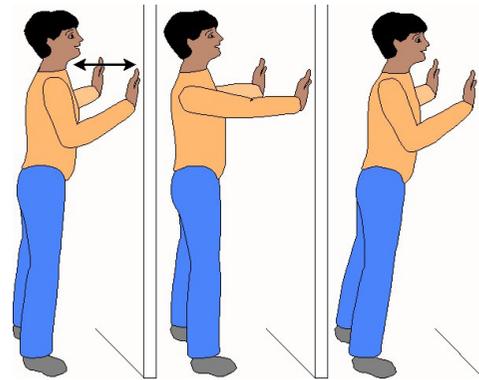

1, 3 or 5 repetitions

HOW TO DO IT

WRIST STRENGTHENER

- ▶ Fold or roll your resistance band or tea towel into a tube shape
- ▶ Sit tall then squeeze the band tightly with both hands, hold for a slow count of 5 then release
- ▶ Make this more challenging by squeezing then twisting your band before holding for 5 seconds

WALL PRESS

- ▶ Place palms on the wall in line with the shoulders
- ▶ Walk feet backwards a few inches, keeping heels on the floor
- ▶ Keep your back straight and tummy muscles firm
- ▶ Bring your chest towards the wall slowly and with control
- ▶ Push back again firmly with control

Directional stepping (in sit and stand)

SEPTEMBER

'Stepping out' in all directions from the hip is all part of reactions to balance challenges and turning/changing directions on our feet. The seated option also helps with moving out of a chair when sat at a table for example.

FREQUENCY

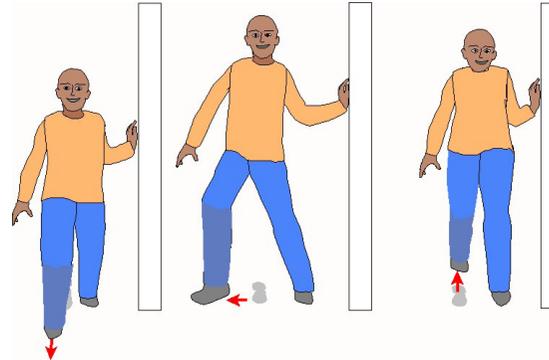

Best done daily

CHOOSE YOUR AMOUNT

Repeat 1, 3 or 5 times

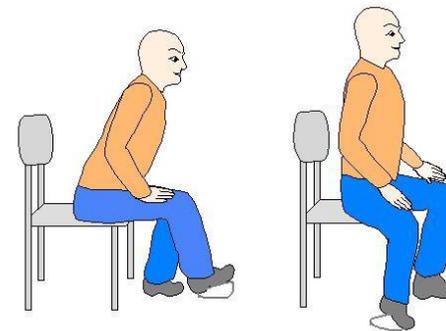

HOW TO DO IT

- Stand close to a wall with space around you
- Take a fairly large step forward and then push back to upright
- Take a step out sideways and push back to upright
- Take a step out behind you and push back to upright
- Start with smaller steps and build to larger ones over time
- Keep your body upright and stay looking forward

SEATED ALTERNATIVE

- Walk your hips forwards to just past the centre of the chair
- Sit taller in an active sitting position, feet flat on the floor at hip width
- Put your hands lightly on the side of the chair for support if needed
- Step one foot forward planting the heel first and rolling through to the ball of the foot, take a small hip hinge and shift weight slightly forward as you step
- Return to tall sit position as you lift off the toe first and step back to start position
- Now lift the foot from the floor to step to the side, focus on replacing the foot leading with the ball of the foot first

This seated option prepares the feet for forward stepping (heel lands first) and also sideways stepping (where the ball of the foot lands first)

Upper Back Strengthenener

OCTOBER

This movement can be performed with or without a tea towel and helps with activities in daily life that 'pull' e.g. to open doors for example and helps strengthen the muscles that hold us upright.

FREQUENCY

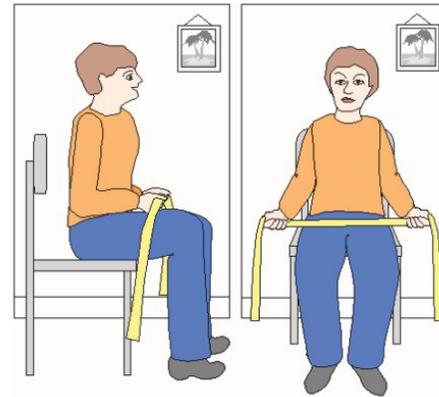

Build into weekly routines, 3 days of the week, for example when you take out the rubbish or prepare the recycling

CHOOSE YOUR AMOUNT

1, 3 or 5 per day

HOW TO DO IT

- ▶ Hold a tea-towel (or a resistance band if you have one) with your palms facing upwards and your wrists straight
- ▶ Pull your hands apart then draw the tea towel towards your hips and squeeze your shoulder blades together
- ▶ Keep your hands and the tea towel at belly button height
- ▶ Keep the wrists firm, maintain usual breathing
- ▶ Return to start position, pause, release the grip
- ▶ Repeat

Moves to Support Walking

NOVEMBER

This selection of moves can improve ankle, foot, hip mobility and strength required for walking and balance reactions.

FREQUENCY

Try the sequence of movements two or three times a week during this month

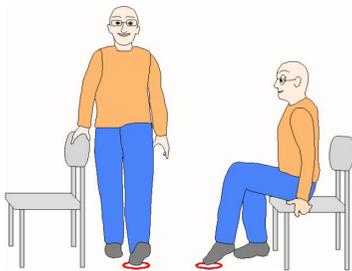

CHOOSE YOUR AMOUNT

As stated in the month they appear

HOW TO DO IT

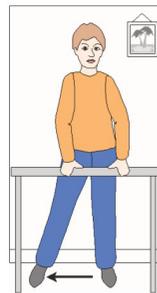

1. ANKLE ACTIVATOR

(FROM JANUARY)

2. SIDWAYS STEPPING

(FROM APRIL)

3. TOE RAISES

(FROM MAY)

4. FLAMINGO SWING

(FROM DECEMBER)

'Flamingo swing' in standing position (and a seated alternative)

DECEMBER

We have two movements to choose from; the flamingo swing will challenge your balance in standing and the seated hip hinge will challenge your seated posture.

Standing Flamingo Swing is beneficial because it can improve balance and strengthen around the hip. It's usual to feel a bit wobbly when doing balance activities, this is how we improve

FREQUENCY

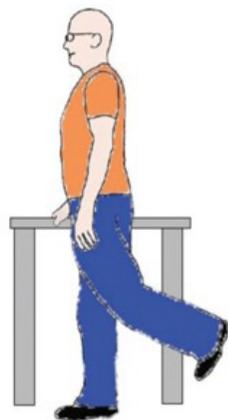

Best done daily

CHOOSE YOUR AMOUNT

Repeat 1, 3 or 5 times

HOW TO DO IT

- ▶ Stand beside a fixed stable support
- ▶ Stand 'taller' with hand on external support to start
- ▶ Lift the leg furthest from the support
- ▶ Swing with control forwards and back
- ▶ Maintain strong standing leg during the swing

Seated hip hinge and functional reach is beneficial to maintain strong postural muscles used for reaching and carrying activities

FREQUENCY

Rehearse throughout the day

CHOOSE YOUR AMOUNT

1, 3 or 5 times in different directions

HOW TO DO IT

- ▶ Walk hips forward so feet are flat to the floor
- ▶ Sit 'taller' ribs away from hips (breathe normally)
- ▶ 'Hinge' the trunk forwards as you reach the arm forwards
- ▶ Keep the posture lifted, back is straight

SUNDAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY

A resource to help with getting up from the floor

Getting up from the floor is a vital skill at any point in life. It requires mobile joints and strong muscles to be able to get up from the floor without too much concern. If you know you can already get down and up from the floor, the message is “keep rehearsing this vital skill” (it’s good to do it whilst others are around). If you are unsure about whether you are able to get up from the floor, making plans to improve mobility, flexibility and strength will certainly help. Many of the movements in this calendar can help with that, frequent movement is key. We have provided information here about the sequence of movements you could work towards and a credible resource providing quality and accurate information about this topic.

This link provides useful advice and a series of videos of older people getting up from the floor showing options to help you

Join us live (you can see us, we can't see you!)

Broadcasting daily movement snacks since March 2020

Join our Make Movement Your Mission group

LIVE at 8am 12pm and 4pm or catchup on demand

A Facebook account is required to join the Make Movement Your Mission page. Either login to Facebook or create a new account if you don't already have one.

STEP 1

Go to Facebook.com and either login or sign up

Email address or phone number

Password

Log In

STEP 2

Locate the search bar near the top left, and search for "Make Movement Your Mission"

Search Facebook

STEP 3

Click on Make Movement Your Mission (MMYM)

Make Movement your Mission (MMYM)
Private group · 3.9K members

STEP 4

On the resulting page click "Join Group"

Make Movement your Mission (MMYM)
Private group · 4.0K members

To join the live sessions: A pop up notification will appear on the "Make Movement Your Mission" page. *Join live at 8am, 12pm and 4pm.*

To catchup: Simply visit <https://www.facebook.com/groups/MakeMovementYourMission/media> and click on "Videos"

Subscribe to the Later Life Training YouTube channel

Selection of Movement Snacks uploaded weekly

You can view the playlist at <https://bit.ly/MMYMplaylist>. No account is required in order to watch, but if you'd like to be notified of when new Make Movement Your Mission videos are uploaded, subscribe to the Later Life Training YouTube channel.
